

## LEADING EDGE SOLUTIONS

From a small aluminium window business servicing single storey buildings in 2004, RJS Aluminium has soared upwards and is Sydney's leading supplier of aluminium windows, doors and curtain walls for domestic and commercial highrise applications.

RJS Aluminium recently completed the 32-storey Skyhaus apartment building in Liverpool and also the 18,000m<sup>2</sup> Equinix Sy3 facility at Alexandria, the largest data centre storage facilities in inner South Sydney for John Holland.

When RJS Managing Director, Robert Sarkis arrived in Australia from Lebanon, he originally wanted to be an architect. Today, he now works at creating architectural glass masterpieces with builders. "We used RJS Aluminium, Architectural Frameless Glass and Spider Patch Fittings at the Equinix facility. In a first for Australia, the building not only looks spectacular but it also achieves a US Green Council Gold LEED rating," said Robert.

All RJS products are tailor-made and manufactured in Australia to Australian Standards. "Unlike most aluminium companies, we also provide high quality architectural glass right here in Australia," explained Robert.

RJS Aluminium Architectural Glass was used at the Auburn Carpark (1 Susan Street), Eden Residences (Wolli Creek), 88 Kensington on Anzac Parade, The George (Burwood) and in many other projects.

RJS Aluminium custom designs and manufactures products for a range of outstanding projects, including the EDO project by award-winning architects Stanisc Associates, the luxury SOHO Residential Apartments and Cote d'Azur Apartments.

"Our unparalleled customer service also means that when you choose RJS Aluminium, your satisfaction is assured," added Robert. "You'll also gain the benefit of working with a team that encompasses a broad knowledge base from architecture through to building. Having such expertise on board enables us to easily communicate and implement your plans, resulting in the outcome you desire."
